

THE NEW TOYOTA HILUX ARCTIC TRUCKS AT35:

“THE LEGEND LIVES ON” - 2018 Commercial Vehicle Show - NEC, Birmingham, UK

Coinciding with the 50th anniversary of the legendary Hilux, Toyota and Arctic Trucks continue their long-established collaboration with Toyota’s unveiling of the new Toyota Hilux Arctic Trucks AT35 at the 2018 Commercial Vehicle Show in Birmingham, United Kingdom between 24th and 26th April.

The vehicle is already a successful model in Scandinavia, Russia and the Middle East. Now, with full EU homologation the new Toyota Hilux Arctic Trucks AT35 is now available to both private and commercial customers throughout the United Kingdom, via the Toyota network.

Together, Toyota and Arctic Trucks have broken world records, established multiple world firsts in both the Arctic and Antarctic, and achieved widespread recognition supporting BBC Top Gear’s adventure to the Magnetic North Pole. All of this demonstrates that Toyota Hilux Arctic Trucks are the first-choice of transportation for scientists, explorers and adventurers alike.

The Toyota Hilux AT35 builds on the established engineering principles of our extreme expedition vehicles. The result is a Hilux that accommodates 35” all-terrain tyres, bespoke performance suspension to provide enhanced ride, handling and a ground clearance increase of 25%, enabling you to truly “explore without limits”!

Commenting on this next chapter, Patrik von Sydow, CEO of Arctic Trucks International said “We’re excited to bring the AT35 version of the legendary Hilux here to the UK. The model is already successful in other countries, so it was a natural decision to develop and launch the vehicle for the UK market”.

Ends

NOTES TO EDITORS:

Toyota Hilux Arctic Trucks AT35 Specification

| | |
|-------------------|-------------------|
| BODY TYPE | Double Cab |
| TRANSMISSION TYPE | 6 speed Automatic |

Major Dimensions and Weights

| | |
|----------------------------|------------|
| TYRE SIZE | 315/70R17 |
| WHEEL SIZE | 17x10 |
| OVERALL LENGTH | 5335mm |
| OVERALL WIDTH | 1990mm |
| OVERALL HEIGHT | 1890mm |
| WHEEL BASE | 3085mm |
| TRACK FRONT | 1650mm |
| TRACK REAR | 1660mm |
| OVERHANG FRONT | 1000mm |
| OVERHANG REAR | 1245mm |
| ANGLE OF APPROACH | 37 degrees |
| ANGLE OF DEPARTURE | 28 degrees |
| GROSS VEHICLE WEIGHT TOTAL | 3250kg |

- Arctic Trucks A-Bars & Sports Bars
- Additional LED Lighting
- Arctic Trucks Under Vehicle Protection
- Arctic Trucks Bonnet & Wind Deflectors
- Arctic Trucks Floor Mats
- Rear Tonneau Covers
- Differential Air Lockers
- Air Compressors
- Winches & Winch Cradles
- Roof Racks
- Snorkels
- Mud & Winter Tyres

About Arctic Trucks

Engineered from Exploration

Since Arctic Trucks was established in Iceland in 1990, the company has grown internationally, supplying over 9000 vehicles to private and commercial customers globally. Specializing in the re-engineering and conversion of four-wheel drive vehicles for extreme conditions from the high plateau of Antarctica to the Deserts of the Middle East. Arctic Trucks have built an unparalleled level of expertise in developing vehicles to deliver handling, safety and reliability improvements both on and off road. Our development engineers are an integral part of every expedition, enabling them to understand, first-hand, the challenges the vehicles they design will need to conquer. This unique insight and experience means our vehicles are able to tame environments our competitors simply do not account for.

Arctic Trucks vehicles have driven over 290,000kms across Antarctica, and famously enabled the BBC Top Gear team to reach the Magnetic North Pole. In the Antarctic a fleet of four and six wheel-drive vehicles are used by scientists to support their work, all under the most extreme conditions our planet has to offer. Arctic Trucks vehicles also set the record for the fastest journey to the South Pole in 2010.

However, you don't need to be a polar explorer to own an Arctic Truck, our vehicles are just as at home in the wilds of the countryside or in the city.
